# PRAKHAR TRIPATHI

## BACKEND-FOCUSED FULL-STACK ENGINEER

*Backend-focused full-stack engineer with experience in system-aware backend services and IoT integrations.*

+91-8707406448 | dev@imprakhartripathi.in
Mathura, Uttar Pradesh

## EDUCATION

### GLA University, Mathura.

- **Bachelor of Technology in Computer Science (Core)**
  *August 2022 to May 2026*
  *Current CGPA: 7.10*

### Seth MR Jaipuria School, Bansal Campus, Lucknow.

- **Higher Secondary School (12th)**
  April *2021 to March 2022*
- **Secondary School (10th)**
  *April 2019 to March 2020*

## SKILLS

### Fundamentals & Programming

Data Structures & Algorithms (DSA), Object Oriented Programming (OOPs) TypeScript, JavaScript, Java, Python

### Web Technologies

Node.js, React, Angular, Express.js, HTML, CSS (Sass), Responsive UI/UX, RESTful APIs, Authentication & Authorization (JWT, RBAC)

### Database Management

MySQL, MongoDB (Atlas)

### Tools & Frameworks

Git, GitHub, Docker, Z Shell, Postman, Razorpay, FFmpeg, Raspberry Pi, VS Code, IntelliJ - IDEA

### Soft Skills

Problem Solving, Analytical Thinking, Adaptability, Collaboration, Attention to Detail

### Currently Exploring

Deno (Hono), and Rust (Systems)

## INTERNSHIPS

### Ferth, Lucknow (Remote) — Feb 2025 - Aug 2025

SDE - Intern

- Delivered performance improvements and upgrades for Angular and Next.js projects in collaboration with senior developers.
- Maintained and enhanced Asha Child Care's website to ensure stability and optimize user experience.

### Ferth, Lucknow (Remote) — Jun 2024 - Oct 2024

Full Stack Web Developer Intern

- Developed full-stack apps with Angular, ASP.NET Core, and MySQL in a team setting.
- Implemented patient management and appointment systems for Asha Child Care, enhancing clinic operations.

## PROJECTS

### Pharmetrix - Smart Pharma Inventory & POS (Cold-Chain IoT)

Sept 2025 – Present | GLA University, Mathura | GitHub | Live
Express.js • React • Node.js • MongoDB • Raspberry Pi • Docker

- Designing and implementing a smart pharmaceutical inventory and POS system with batch-wise stock management and expiry-first dispensing logic.
- Building an IoT-ready architecture using Raspberry Pi and edge processing to capture and synchronize data with the cloud.
- Developing a dual-mode sales workflow (quick/proper) with a future-ready, scalable system architecture.

### Spendly – Financial Management with Smart Analytics

May 2025 – Jul 2025 | Personal Project | GitHub | Live
Express.js • React • Node.js • MongoBD • Docker

- Built a financial tracker with RBAC and JWT security, reducing manual expense logging by 80% for test users.
- Implemented RBAC, ensuring secure access control across 3 subscription tiers and MongoDB schemas for users and transactions.

### Sahyogi – AI Powered Task Management

Jan 2025 – Apr 2025 | GLA University, Mathura | GitHub | Live
Express.js • Angular • Node.js • MongoDB

- AI-assisted task management system improving task prioritization efficiency by ~30% in testing.
- JWT-based authentication with responsive Angular + Material UI UX.
