PRAKHAR TRIPATHI

BACKEND-FOCUSED FULL-STACK ENGINEER

Backend-focused full-stack engineer with experience in system-aware backend services and IoT integrations.

dev@imprakhartripathi.in | imprakhartripathiofficial@gmail.com
Mathura, Uttar Pradesh

EDUCATION

GLA University, Mathura.
Bachelor of Technology in Computer Science (Core)
August 2022 to May 2026

SKILLS

Fundamentals & Programming
Data Structures & Algorithms (DSA), Object Oriented Programming (OOPs) TypeScript, JavaScript, Java, Python

Web Technologies
Node.js, React, Angular, Express.js, Spring Boot, Spring MVC, Spring Security, RESTful APIs, Microservices, JWT, OAuth2, RBAC, HTML, CSS (SASS), Responsive UI/UX

Database Management
MySQL, PostgreSQL, MongoDB (Atlas), Redis (Basics)

Tools & Frameworks
Git, GitHub, Z Shell, Maven, JUnit, OpenAPI (Swagger), Postman, Razorpay, FFmpeg, RabbitMQ, Raspberry Pi, VS Code, IntelliJ - IDEA

Cloud & DevOps
AWS (EC2, S3, IAM), Google Cloud (Compute Engine, Cloud Run, IAM), Docker, GitHub Actions, CI/CD, Deployment Pipelines

Certifications
Google AI Professional Certificate
Google Cloud Infrastructure: Core Services (View Credentials)

Currently Exploring
Deno (Hono), and Rust (Systems)

INTERNSHIPS

Ferth, Lucknow (Remote) — Feb 2025 - Aug 2025
SDE - Intern

- Delivered performance improvements and upgrades for Angular and Next.js projects in collaboration with senior developers.
- Maintained and enhanced Asha Child Care's website to ensure stability and optimize user experience.

Ferth, Lucknow (Remote) — Jun 2024 - Oct 2024
Full Stack Web Developer Intern

- Developed full-stack apps with Angular, ASP.NET Core, and MySQL in a team setting.
- Implemented patient management and appointment systems for Asha Child Care, enhancing clinic operations.

PROJECTS

Pharmetrix - Smart Pharma Inventory & POS (Cold-Chain IoT)
Sept 2025 – Present | GLA University, Mathura | GitHub | Live
Express.js • React • Node.js • MongoDB • Raspberry Pi • Docker

- Designing and implementing a smart pharmaceutical inventory and POS system with batch-wise stock management and expiry-first dispensing logic.
- Building an IoT-ready architecture using Raspberry Pi and edge processing to capture and synchronize data with the cloud.
- Developing a dual-mode sales workflow (quick/proper) with a future-ready, scalable system architecture.

SpendSmart - Expense Tracker with Data Visualization
April 2026 - Present | Personal Project | GitHub
Spring Boot • React • PostgreSQL • Redis • RabbitMQ • Docker • AWS

- Building a microservices finance platform with JWT, OAuth2, RBAC, and recurring scheduler workflows.
- Developing analytics dashboards, budget alerts, and RabbitMQ-based async notifications with PDF exports.

Sahyogi – AI Powered Task Management
Jan 2025 – Apr 2025 | GLA University, Mathura | GitHub | Live
Express.js • Angular • Node.js • MongoDB

- AI-assisted task management system improving task prioritization efficiency by ~30% in testing.
- JWT-based authentication with responsive Angular + Material UI UX.
