

PRAKHAR TRIPATHI

BACKEND-FOCUSED FULL-STACK ENGINEER

Backend-focused full-stack engineer with experience in system-aware backend services and IoT integrations.

dev@imprakhartripathi.in | imprakhartripathiofficial@gmail.com
Mathura, Uttar Pradesh

EDUCATION

GLA University, Mathura.
Bachelor of Technology in Computer Science (Core)
August 2022 to May 2026

SKILLS

Fundamentals & Programming
Data Structures & Algorithms (DSA),
Object Oriented Programming (OOPs)
TypeScript, JavaScript, Java, Python

Web Technologies
Node.js, React, Angular, Express.js,
Spring Boot, Spring MVC, Spring
Security, RESTful APIs, Microservices,
JWT, OAuth2, RBAC, HTML, CSS
(SASS), Responsive UI/UX

Database Management
MySQL, PostgreSQL, MongoDB
(Atlas), Redis (Basics)

Tools & Frameworks
Git, GitHub, Z Shell, Maven, JUnit,
OpenAPI (Swagger), Postman,
Razorpay, FFmpeg, RabbitMQ,
Raspberry Pi, VS Code, IntelliJ - IDEA

Cloud & DevOps
AWS (EC2, S3, IAM), Google Cloud
(Compute Engine, Cloud Run, IAM),
Docker, GitHub Actions, CI/CD,
Deployment Pipelines

Certifications
Google AI Professional Certificate
Google Cloud Infrastructure: Core
Services ([View Credentials](#))

Currently Exploring
Deno (Hono), and Rust (Systems)

INTERNSHIPS

Ferth, Lucknow (Remote)
SDE - Intern Feb 2025 - Aug 2025

- Improved performance and stability of Angular & Next.js applications.
- Optimized UI responsiveness and resolved production-level issues.

Full Stack Web Developer Intern Jun 2024 - Oct 2024

- Built full-stack features using Angular, ASP.NET Core, and MySQL.
- Developed patient management and appointment workflows for a clinic system.

PROJECTS

SculptorTS - Backend Framework with Hybrid Routing & CLI
April 2026 - Present | [NPM](#) | [GitHub](#) | [Full Details](#) | [Docs](#)
TypeScript • Express.js • Node.js • CLI

- Designing a hybrid backend framework with functional and decorator-based routing based on Express.js.
- Building CLI tooling for scaffolding with configuration management, generators that auto-create code and test suites, and enforcing a TDD-friendly project structure.
- Developing a modular, registry-based architecture with configurable runtime and integrated logging.

Pharmetrix - Smart Pharma Inventory & POS (Cold-Chain IoT)
Sept 2025 - Present | [Live](#) | [Patent Pending](#)
Express.js • React • Node.js • MongoDB • Raspberry Pi • Docker

- Designing and implementing a smart pharmaceutical inventory and POS system with batch-wise stock management and expiry-first dispensing logic.
- Built an IoT-ready architecture using Raspberry Pi and edge processing to capture and synchronize data with the cloud.
- Designed a dual-mode sales workflow (quick/proper) with a future-ready, scalable system architecture.

SpendSmart - Expense Tracker with Data Visualization
April 2026 | [GitHub](#)
Spring Boot • React • PostgreSQL • Redis • RabbitMQ • Docker • AWS

- Built a microservices finance platform with JWT, OAuth2, RBAC, and recurring scheduler workflows.
- Designed analytics dashboards, budget alerts, and RabbitMQ-based async notifications with PDF exports.
